

Keihanna Research Complex

"i-Brain x ICT: Global Research Complex to Create a Meta-Comfort and Smart Society"

Opening Symposium

Searching for new business opportunities!

March 27 (Mon), 2017 10:00 – 19:20

Venue: Keihanna Open Innovation Center (KICK)

<http://kick.kyoto/> ※Please use public transportation

The establishment of Keihanna Research Complex (RC) provides a great opportunity to create new businesses in the Keihanna region, through the utilization of its potential resources and the innovation ecosystem that will emerge. This symposium will disseminate information about Keihanna RC's activities to promote research and development based on the integration of different fields of knowledge, human resource development, and commercialization support in an effort to realize a meta-comfort and smart society. It will also provide an opportunity to learn about the origin and development of Israel's high-profile ecosystems, and to discover new business opportunities and networking, such as global cooperation with accelerators in New York.

※Simultaneous interpretation available
