

**Global Innovation Seminar**  
by Keihanna Research Complex

# Innovation by AI, IoT, and Robotics

— Key to Success in the VUCA Era —

2019

**5/31** **Fri**

**1:30-3:00 p.m.**

**Advanced Telecommunications  
Research Institute International (ATR)**

**Available  
Online**

We are living a Paradigm Shift in Economy, Business, Sciences, Society and Politics that is known as The Fourth Industrial Revolution, where disruptive changes and uncertainty are the drivers. New approaches are required to innovate in business, speed the time to market, improve efficiency and increase agility to survive in Volatile, Uncertain, Complex & Ambiguous times (VUCA). This lecture approaches the science and technology enablers and strategic elements of the Paradigm Shift driven by the Artificial Intelligence, Internet of Things and Robotics, and the development of Industry 4.0 business strategies in a disruptive context.

## Program

### Lecture “Keihanna Research Complex”

Ms.Makiko Tatsumi , Advanced Telecommunications Research Institute International (ATR)

### Lecture “AI, IOT & Robotics Enabling Business Innovation”

Dr. Jorge Calvo, Deputy Dean, GLOBIS University Graduate School of Management; and professor, ESADE Business School
